

Define security attributes- data confidentiality, authentication, data integrity and non-repudiation.

What are DOS and Replay attacks?

What are the differences between symmetric key and public key cryptography?

What are Passive and Active attacks?

Draw the model of network security?

What are security mechanism and security services?

Caesar Cipher and Playfair Cipher

Monoalphabetic ciphers with example.

DES single round.

Diffie-Hellman Key exchange protocol.

Double and triple DES

RSA algorithm.
